

28 DAY FAT LOSS KICKSTART

*A Simple, Structured Program to
Jumpstart Your Fat Loss Journey!*

garciabuilder.fitness

STEPS 1

1/8 |

CLARITY

BEFORE ACTION

Most people don't fail because they lack motivation — they fail because they don't have a clear target. "I want to lose weight" is too vague. How much? By when? And why? The clearer the goal, the easier it becomes to stay consistent.

STEPS 1

1/8 |

CHOOSE

YOUR MAIN GOAL

For the next 28 days, pick ONE primary focus. Trying to fix everything at once creates burnout. Choose what matters most right now: fat loss, strength, stamina, or simply consistency. Write it in one sentence — that becomes your compass for every workout and every meal.

STEPS 2

2/8 |

NON-NEGOTIABLES

FOR 28 DAYS

You don't need a perfect plan. You need a simple one you can actually follow. For the next 28 days, we're reducing decisions and focusing on the few actions that drive results. If you try to change everything at once, you burn out. If you commit to a few non-negotiables, you win.

www.garciabuilder.fitness

STEPS 2

2/8 |

DO THIS

EVERY WEEK

- 3 workouts per week (45 minutes each)
- 8,000–10,000 steps per day
- Protein with every meal
- 2–3 litres of water per day
- 80% consistency (don't aim for perfect)

If life gets busy, don't quit — return to these basics.

This is the foundation of your Kickstart.

STEPS 3

3/8 |

THE PLATE

METHOD

You don't need to count calories to start losing fat. You need structure. The Plate Method makes every meal simple: build your plate the same way every time, and fat loss becomes automatic. This removes stress, confusion, and "what should I eat?" decisions.

STEPS 3

3/8 |

BUILD EVERY

MEAL LIKE THIS

- 1–2 palms of protein (chicken, eggs, fish, beef, Greek yogurt)
- 1 fist of carbs (rice, potatoes, oats, pasta, fruit)
- 1 thumb of fats (olive oil, nuts, avocado, cheese)
- 2 fists of vegetables (or salad)

Rule: Start with protein first.

STEPS 3

3/8 |

REAL MEAL

EXAMPLES

Breakfast: Eggs + oats + fruit (protein + carbs)

Lunch: Chicken + rice + vegetables (balanced plate)

Dinner: Salmon + potatoes + salad (protein + carbs + fat)

Snack (optional): Greek yogurt OR a protein shake

Quick rule: If you're unsure what to eat, ask: "Where is my protein?"

MAKE FOOD

EASY

Most people don't fail because they don't know what to do.

They fail because they don't know what to eat when life gets busy.

This step removes decision fatigue.

You will build a simple food list — so every meal becomes a quick choice, not a daily struggle.

YOUR

FOUNDATION LIST

PROTEIN (choose 1)

Chicken, turkey, lean beef, fish, eggs, Greek yogurt, cottage cheese, protein shake

CARBS (choose 1)

Rice, potatoes, oats, pasta, wraps, bread, fruit, cereal, beans

STEPS 4

4/8 |

ADD THIS

TO COMPLETE IT

VEGETABLES (add 1–2)

Salad, broccoli, peppers, spinach, carrots, mixed veg, tomatoes, cucumber

FATS (small portion)

Olive oil, nuts, avocado, cheese, peanut butter, butter

Quick rules:

- Protein first (every meal)
- Keep fats small (easy to overeat)
- If you're stuck: Protein + veg + water

BUILD A

DAILY ROUTINE

Fat loss isn't about eating "perfect food".

It's about having a routine you can repeat.

Most people fail because they "wing it" every day — then hunger, cravings, and random choices take over.

This step gives you a simple daily structure so you stay consistent without overthinking.

CHOOSE YOUR

MEAL FREQUENCY

Pick the structure that fits your life.
Both work. Consistency matters more than timing.

Option 1 — 3 Meals per day

Breakfast / Lunch / Dinner

Option 2 — 3 Meals + 1 Snack

Breakfast / Lunch / Snack / Dinner

Rule: Don't skip meals and then "attack" food at night. Your goal is stable energy, stable hunger, stable decisions.

THE 2

SMART RULES

1) Plan your first meal early

Start the day with a clear decision. It reduces cravings later.

2) Decide your “rescue meal”

A simple meal you can always rely on when life gets busy.

Example: chicken + rice + veg / eggs + toast + fruit / protein shake + yogurt.

When your day goes off track, don't quit.

Use the rescue meal and move on.

EATING OUT

WITHOUT GUILTY

Fat loss doesn't require you to stop living.

But it does require you to stop using meals out as an excuse to quit.

One meal won't ruin your progress.

But the "I messed up" mindset will.

This step shows you how to eat out, stay in control, and get right back on track.

THE 5

RULES

Follow these rules when you eat out:

- 1) Choose a meal with protein
- 2) Pick one: carbs or dessert (not both)
- 3) Skip liquid calories (no sugary drinks)
- 4) Start with a salad/veg if possible
- 5) Stop at 80% full (you don't need to "finish")

THE RESET

RULE

The next meal is what matters most.
No starving. No punishment cardio. No guilt.
Just return to your structure.

Reset Plan:

- Drink water
- Protein + vegetables
- Hit your steps that day
- Back to normal the next meal

Consistency beats perfection. Always.

YOUR 28-DAY

TRAINING PLAN

You don't need to train every day to lose fat.
You need a plan you can repeat.

For the next 28 days:
3 workouts per week — 45 minutes each.

Example schedule:
Mon / Wed / Fri (or Tue / Thu / Sat)

Your goal: build strength, keep muscle, and
create momentum.

WORKOUT

A

×
×
×

- 1) Squat OR Leg Press — 3 sets
- 2) Bench Press OR Dumbbell Press — 3 sets
- 3) Seated Row OR Dumbbell Row — 3 sets
- 4) RDL OR Hamstring Curl — 2–3 sets
- 5) Plank OR Crunches — 2 sets

WORKOUT

B

1) RDL OR Trap Bar Deadlift — 3 sets

2) Shoulder Press (machine or dumbbells) — 3 sets

3) Lat Pulldown OR Assisted Pull-ups — 3 sets

4) Lunges OR Step-ups — 2–3 sets

5) Leg Raises OR Cable Crunch — 2 sets

STEPS 7

7/8 |

WORKOUT

1) Hip Thrust OR Glute Bridge — 3 sets

2) Incline Press OR Push-ups — 3 sets

3) Chest-Supported Row OR Cable Row — 3 sets

4) Leg Extension — 2 sets

5) Hamstring Curl — 2 sets

Optional finisher: 8–10 min incline walk or bike.

HOW TO

EXECUTE

Reps: 8–12 on most exercises

Rest: 60–90 seconds

Effort: stop with 1–2 reps left (no ego lifting)

Progression rule:

If you hit the top reps with good form, add a little weight next time.

Busy day rule:

If you only have 25 minutes: do 1 squat + 1 push + 1 pull and leave.

PROGRESS

OR STAGNATE

You need to improve something over time.

If you lift the same weights, do the same reps, and put in the same effort every week... your body has no reason to change.

Progression is the difference between "training" and "just exercising."

THE 3

WAYS TO PROGRESS

Each week, improve one thing:

1) Reps

Same weight → more reps.

2) Weight

Same reps → slightly heavier.

3) Control

Better form, slower tempo, full range.
Small progress = big results over 28 days.

TRACK IT

×
×
×

OR LOSE IT

If you don't track it, you guess.
If you guess, you repeat the same week.

Write down:

- exercise
- weight
- reps

Rule: when you hit the top reps with good form, increase weight next time.
Progress doesn't need to be perfect — it needs to be consistent.
